Princess	☀ 2-3'	3-4'	white	May	☀ ↻ light pink buds open to white flowers; silvery fuzz on new growth

An Eastern exposure is the preferred placement for this group of plants. Broadleaf Evergreens enjoy morning sun for their foliage and flowering vigor, but prefer to keep cool in the afternoon shade. Just as important is the protection found here during the winter months when strong winds and sunlight can dry and severely damage the leaves and buds. Please refer to our Broadleaf Evergreen care sheet for more information about safe planting areas for Broadleaf Evergreens.
